ANSWER KEY · LOOK-ALIKE LETTERS · GRADES 2–5

Answer Key: Letters That Move: J and Z

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

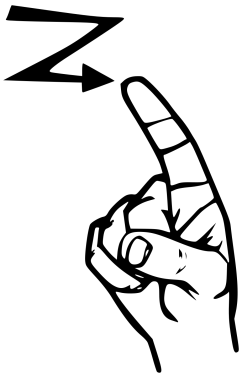

J starts as an **I** (only the pinky up) and the pinky draws a **J** in the air. **Z** uses only the pointer finger, which draws a **Z** in the air.

Make each handshape, then trace the letter it draws.

J

Z

Circle the answer.

Which finger draws the J? **pinky** pointer thumb

Which finger draws the Z? pinky **pointer** thumb

J starts with the handshape for which letter? A **I** L

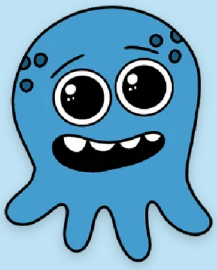

How many letters in the ASL alphabet move? **2** 5 26

ANSWER KEY · DEAF CULTURE AND MANNERS · GRADES 2–5

Answer Key: What Is ASL?

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

American Sign Language, or ASL, is a language you see instead of hear. Signers use their hands, their faces and their bodies to share ideas. Many Deaf and hard of hearing people in the United States and much of Canada use ASL, and so do their families and friends.

ASL is not English on the hands. It has its own words and its own grammar, the rules for putting signs together. A sentence in ASL often puts its signs in a different order than English does.

Sign language is not the same all over the world. Many countries have their own. British Sign Language is very different from ASL, even though people in both countries speak English. ASL is related to French Sign Language, because a Deaf teacher from France helped start the first lasting school for the deaf in America in 1817.

Fingerspelling, spelling a word letter by letter, is one part of ASL. Signers use it for names, places and words that do not have a sign.

Answer the questions.

What does ASL stand for?

American Sign Language

Signers use their hands. What else do they use?

Their faces and their bodies

Is ASL the same as English? How do you know?

No. It has its own words and grammar.

Is sign language the same everywhere in the world?

No. Many countries have their own.

When do signers use fingerspelling?

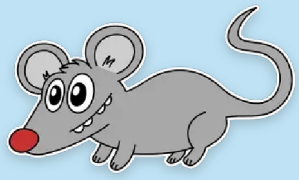

For names, places and words with no sign

Art © Kevin Coulston

ANSWER KEY · DEAF CULTURE AND MANNERS · GRADES 2–5

Answer Key: ASL True or False

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Circle True or False.

ASL has its own grammar.	**True**	False
Every country uses the same sign language.	True	**False**
Your face is part of signing in ASL.	**True**	False
ASL and British Sign Language are the same language.	True	**False**
ASL is used in the United States and much of Canada.	**True**	False
Fingerspelling is used for names and places.	**True**	False
Deaf people can only talk with other Deaf people.	True	**False**
Shouting is a polite way to get a Deaf person's attention.	True	**False**
ASL is related to French Sign Language.	**True**	False
Hearing people can learn ASL too.	**True**	False

ANSWER KEY · DEAF CULTURE AND MANNERS · GRADES 1–4

Answer Key: Getting Someone's Attention

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Ways to get attention

tap their shoulder gently · wave where they can see you · flick the lights for a group · tap the table so they feel it · shout their name · grab their face to turn it · throw something at them · wave right in front of their eyes

Write each one under Polite or Not polite.

Polite	Not polite
tap their shoulder gently	shout their name
wave where they can see you	grab their face to turn it
flick the lights for a group	throw something at them
tap the table so they feel it	wave right in front of their eyes

Answer the questions.

Once you have their attention, where should you look while you sign?

At the person, keeping eye contact

Why is it rude to look away while someone signs to you?

Signing is seen, so looking away means you stopped listening.

Art © Kevin Coulston

ANSWER KEY · DEAF CULTURE AND MANNERS · GRADES 2–5

Answer Key: What Is a Name Sign?

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Many people in the Deaf community have a name sign. A name sign is a short sign that stands for one person, so friends do not have to fingerspell the whole name every time.

In Deaf culture, a name sign is given to you by a Deaf person who knows you. You do not make up your own. Until someone gives you one, you fingerspell your name.

Some name signs use the first letter of the person's name, made in a special place or with a special movement. Others show something about the person, like curly hair or a big smile.

Answer the questions.

What is a name sign?

A short sign that stands for one person

Who gives you a name sign?

A Deaf person who knows you

What do you do until you have a name sign?

Fingerspell your name

Name two kinds of name signs.

First-letter signs and signs that show something about the person

Why are name signs handy?

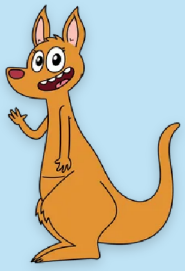

They are faster than spelling a whole name.

Art © Kevin Coulston

ANSWER KEY · DEAF CULTURE AND MANNERS · GRADES 1–4

Answer Key: Ways We Communicate

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Deaf and hard of hearing people choose what works for them, and many use more than one of these.

Draw a line from each tool to what it does.

Interpreter	a person who turns signs into spoken words and spoken words into signs
Captions	words on a screen that show what people are saying
Hearing aid	a small device worn on the ear that makes sounds louder
Cochlear implant	a device placed by a doctor that sends sound signals to the hearing nerve
Video phone	a call on a screen so people can sign to each other
Flashing doorbell	a light that blinks when someone rings the bell

ANSWER KEY · DEAF HISTORY · GRADES 3–5

Answer Key: Meet Laurent Clerc

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Laurent Clerc was born in France in 1785. He became deaf when he was a baby. When he was 12 he went to a school for deaf children in Paris, where he learned French Sign Language. He did so well that the school later hired him as a teacher.

In 1816 an American named Thomas Hopkins Gallaudet came to the school. Gallaudet wanted to start a school for deaf children in the United States, and he asked Clerc to help. Clerc said yes. On the long trip across the ocean, Clerc taught Gallaudet sign language and Gallaudet helped Clerc with English.

In 1817 they opened a school in Hartford, Connecticut. Today it is called the American School for the Deaf, the oldest school for the deaf in the United States that is still open. Clerc taught there for more than 40 years and trained teachers who started schools across the country.

The signs Clerc brought from France mixed with the signs deaf Americans were already using. Over many years, this mix grew into American Sign Language.

Answer the questions.

In what country was Laurent Clerc born?

France

What language did he learn at school in Paris?

French Sign Language

Who asked Clerc to come to America?

Thomas Hopkins Gallaudet

When and where did their school open?

1817 in Hartford, Connecticut

How did Clerc's signs help make ASL?

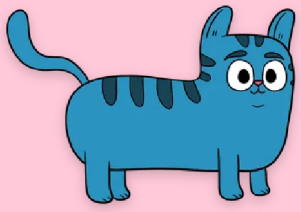

They mixed with signs deaf Americans already used.

Art © Kevin Coulston

ANSWER KEY · DEAF HISTORY · GRADES 3–5

Answer Key: Meet Thomas Hopkins Gallaudet and Alice Cogswell

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Thomas Hopkins Gallaudet was a hearing minister in Hartford, Connecticut. His neighbors had a daughter named Alice Cogswell. Alice was deaf, and at that time there was no school in the United States where she could learn.

Gallaudet saw that Alice was bright and eager to learn. A famous story says he taught her her first word, hat, by pointing to his hat and writing the letters in the dirt.

Alice's father, Dr. Mason Cogswell, and other families raised money to send Gallaudet to Europe in 1815 to learn how deaf children were taught. There he met Laurent Clerc, a Deaf teacher at the school for the deaf in Paris, and brought him back to America.

In 1817 they opened the school now called the American School for the Deaf, and Alice was one of its first students. In 1864 a college for deaf students was started in Washington, D.C. Today it is Gallaudet University, named for Thomas, and his son Edward was its first leader.

Answer the questions.

Who was Alice Cogswell?

Gallaudet's deaf neighbor

Why did Gallaudet go to Europe?

To learn how deaf children were taught

Whom did he bring back to America?

Laurent Clerc

What school did they open in 1817?

The American School for the Deaf

What university is named for Thomas Hopkins Gallaudet?

Gallaudet University

ANSWER KEY · DEAF HISTORY · GRADES 3–5

Answer Key: Martha's Vineyard: An Island That Signed

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Martha's Vineyard is an island off the coast of Massachusetts. For more than 200 years, starting in the 1700s, many people there were born deaf. In the town of Chilmark, about 1 out of every 25 people was deaf.

Because deafness was so common, almost everyone on the island learned to sign, hearing people too. Deaf and hearing neighbors fished, farmed and went to town meetings together. Hearing people sometimes signed to each other even with no deaf person around, like across a field or a boat.

Their language is called Martha's Vineyard Sign Language. Deaf children from the island went to the school in Hartford, Connecticut, where their signs mixed with others. Many experts think it was one of the languages that helped form ASL.

Over time, people moved away and fewer deaf children were born on the island. The last deaf person who grew up using the island's sign language died in 1952.

Answer the questions.

Where is Martha's Vineyard?

Off the coast of Massachusetts

Who on the island learned to sign?

Almost everyone, deaf and hearing

What was the island's language called?

Martha's Vineyard Sign Language

How did the island's signs help ASL?

Island children took them to school in Hartford, where they mixed into ASL.

How do you think signing together made life fairer for deaf islanders?

They could talk with everyone in town.

ANSWER KEY · DEAF HISTORY · GRADES 3–5

Answer Key: Deaf President Now

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Gallaudet University in Washington, D.C., is a university for deaf and hard of hearing students. In its first 124 years, it never had a Deaf president.

In March 1988, the university's board chose a new president. Two of the three finalists were deaf, but the board picked the hearing finalist, who did not know sign language. Students believed a university for deaf students should have a Deaf leader.

Students closed the campus and marched to the U.S. Capitol. They made four demands, including a Deaf president and more deaf people on the board. Teachers, workers and people across the country joined them. The protest was called Deaf President Now.

After a week, the students won. On March 13, 1988, I. King Jordan was named the first Deaf president of Gallaudet University. He said, "Deaf people can do anything hearing people can do, except hear."

Answer the questions.

What is Gallaudet University?

A university for deaf and hard of hearing students

Why were the students upset?

The board picked a hearing president who did not know sign language.

What was the protest called?

Deaf President Now

Who became the first Deaf president, and when?

I. King Jordan, March 13, 1988

What do you think Jordan's words mean?

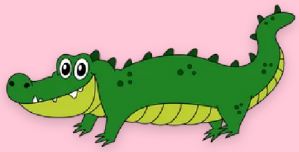

Being deaf does not stop people from doing any job.

Art © Kevin Coulston

ANSWER KEY · DEAF HISTORY · GRADES 3–5

Answer Key: Deaf History Timeline

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Events (not in order)

Deaf President Now: Gallaudet University gets its first Deaf president (1988).

The first lasting school for the deaf in America opens in Hartford, Connecticut (1817).

The Americans with Disabilities Act becomes law, protecting the rights of deaf people and others with disabilities (1990).

President Abraham Lincoln signs the law that starts a college for deaf students, now Gallaudet University (1864).

William Stokoe publishes a study showing that ASL is a real language with its own grammar (1960).

At a meeting in Milan, Italy, teachers vote that deaf schools should teach speech instead of sign language (1880).

Write each event next to its year.

1817 — First school for the deaf opens in Hartford

1864 — Lincoln signs the law for a deaf college

1880 — Milan meeting votes for speech over sign

1960 — Stokoe shows ASL is a real language

1988 — Deaf President Now

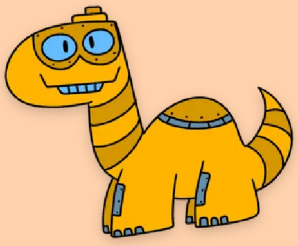

1990 — Americans with Disabilities Act

ANSWER KEY · HOW ASL WORKS · GRADES 2–5

Answer Key: The Five Parts of a Sign

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Every sign is made of five parts. Change just one part and you can make a different sign.

Draw a line from each part to what it means.

Handshape	the shape your hand makes
Palm orientation	which way your palm faces
Location	where you make the sign, like near your chin
Movement	how your hand moves
Facial expression	what your face shows while you sign

Name the part.

The sign is made next to your forehead.

Location

Your hand taps two times.

Movement

Your eyebrows go up.

Facial expression

Your hand is shaped like the letter B.

Handshape

Art © Kevin Coulston

ANSWER KEY · HOW ASL WORKS · GRADES 3–5

Answer Key: Eyebrows Ask Questions

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

For a **yes or no question**, raise your eyebrows **up**. For a question that starts with **who, what, where, when, why, which** or **how**, pull your eyebrows **down** and together.

Circle what your eyebrows do for each question.

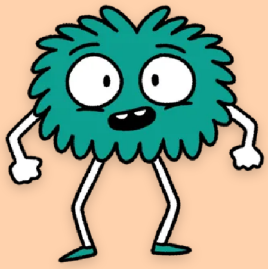

Do you like pizza?	**Up**	Down
Where is the library?	Up	**Down**
Is it raining?	**Up**	Down
Who is your teacher?	Up	**Down**
Can you sign?	**Up**	Down
What is your name?	Up	**Down**
Are you hungry?	**Up**	Down
Why are you sad?	Up	**Down**
How old are you?	Up	**Down**
Do you have a pet?	**Up**	Down

Art © Kevin Coulston

ANSWER KEY · HOW ASL WORKS · GRADES 2–4

Answer Key: Which Hand Do I Sign With?

Answers for grown-ups. Where kids write their own ideas, the key shows one example.

Read

Most people have a dominant hand: the hand they write with and use the most. When you fingerspell or make a one-handed sign, use your dominant hand.

If you are right-handed, your right hand is dominant. If you are left-handed, your left hand is. Both are correct in ASL.

Pick one hand and stick with it. Switching hands back and forth makes your signing harder to read.

In two-handed signs where the hands do different things, the dominant hand usually moves and the other hand stays still, like a base.

Answer the questions.

What is a dominant hand?

The hand you write with and use the most

Which hand do you use to fingerspell?

Your dominant hand

Is it OK to sign with your left hand?

Yes, if you are left-handed

Why should you not switch hands?

It makes signing harder to read.

Which hand is your dominant hand?

My right hand (answers vary)
