Animals in Winter

Sort nine animals by how they get through winter: hibernate, migrate or adapt.

Name: _____ **Date:** _____

Animals get ready for winter in different ways. Some **hibernate**: they sleep deeply all winter. Some **migrate**: they travel somewhere warmer. Some **adapt**: they stay and change how they live.

Write each animal under what it does in winter.

humpback whale | deer (grows a thick coat) | monarch butterfly | bat | groundhog | Canada goose | snowshoe hare (turns white) | squirrel (stores nuts) | black bear

Hibernate	Migrate	Adapt

If you were an animal, would you hibernate, migrate or adapt? Why?
