SCIENCE · DAY AND NIGHT · GRADES 3–5

How Long Is the Day?

Write the sunrise and sunset times once a week for six weeks, work out the hours of daylight and explain the change.

Name: _____ **Date:** _____

How to do it: once a week, look up today's sunrise and sunset times in a weather app or newspaper. Subtract to find the hours of daylight. **Example:** sunrise 7:00 a.m., sunset 5:00 p.m. = 10 hours.

Date	Sunrise	Sunset	Hours of daylight
Week 1			
Week 2			
Week 3			
Week 4			
Week 5			
Week 6			

Longest day _____ **Shortest day** _____

Are the days getting longer or shorter? What season is coming next?
