My Bones

Match the skull, ribs, spine and femur to their jobs, then mark six bone facts true or false.

Name: _____ **Date:** _____

You have **206 bones**. Together they are your **skeleton**. Bones hold you up, let you move and protect the soft parts inside you.

1. Draw a line from each bone to its job.

skull ●	● holds you up and lets you bend
ribs ●	● protects your brain
spine (backbone) ●	● the longest, strongest bone, in your leg
femur (thigh bone) ●	● protect your heart and lungs

2. Circle True or False.

Bones are alive and can grow.	True	False
A broken bone can heal itself.	True	False
Babies have fewer bones than grown-ups.	True	False
Milk and cheese have calcium that makes bones strong.	True	False
Your skull is made of one single bone.	True	False
Bones meet at joints like your elbow and knee.	True	False
