Sea Animal Adaptations

Match seven sea animals to the body part or behavior that helps them live in the ocean.

Name: _____ **Date:** _____

An **adaptation** is a body part or a behavior that helps an animal live in its habitat.

Draw a line from each sea animal to its adaptation.

octopus	a hard shell protects its soft body
sea turtle	a glowing lure draws food close in the dark
whale	flippers paddle it for miles
jellyfish	breathes air through a blowhole
crab	stinging tentacles catch food
dolphin	thick blubber keeps it warm
anglerfish	squirts ink to escape from enemies

Which adaptation would you like to have? Why?

_____
