The Water Cycle

Label evaporation, condensation, precipitation and collection on the diagram.

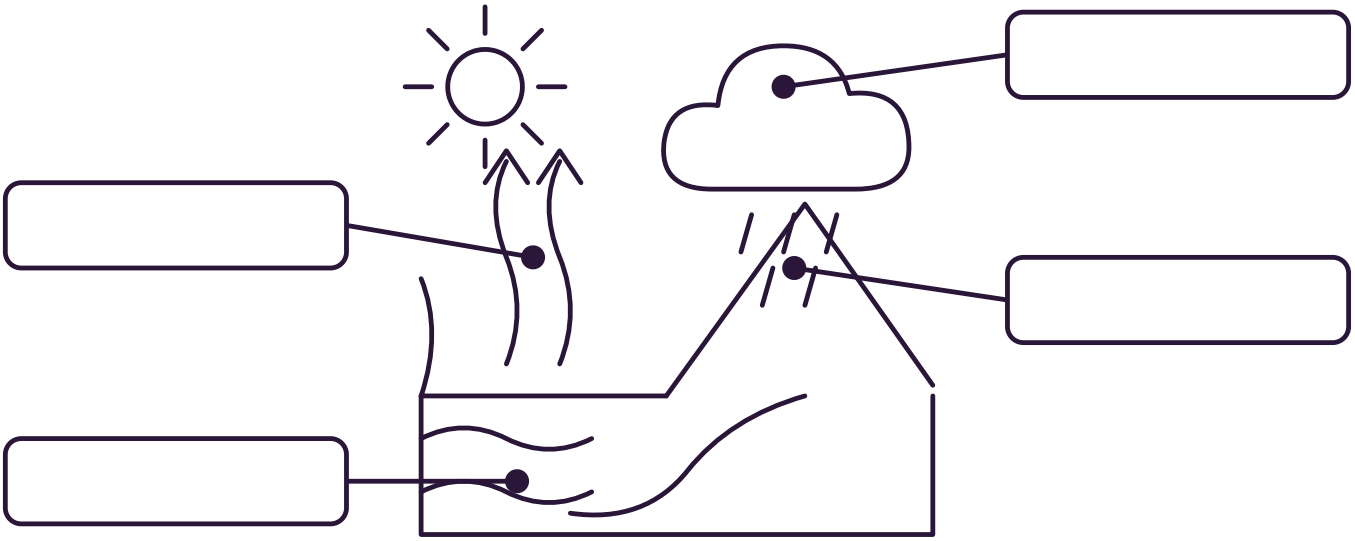

Name: _____ **Date:** _____

Word bank

evaporation | condensation | precipitation | collection

Write the name of each step of the water cycle.

The **sun** heats water in oceans, lakes and rivers until it turns into water vapor and rises (**evaporation**). High up, the vapor cools into clouds (**condensation**). Rain or snow falls (**precipitation**) and runs back into the water (**collection**). Then it starts again!

What powers the water cycle?

_____
