How Far Is It? Using a Map Scale

A map scale tells you how far things really are. On this map, 1 inch = 10 miles. Measure each road with a ruler, then figure out the miles.

Name: _____ **Date:** _____

1. **Farm to Town:** _____ **inches =** _____ **miles**
2. **Town to Lake:** _____ **inches =** _____ **miles**
3. **Farm to Zoo:** _____ **inches =** _____ **miles**
4. **Town to Train station:** _____ **inches =** _____ **miles**
5. **Train station to School:** _____ **inches =** _____ **miles**
6. **Zoo to Lake:** _____ **inches =** _____ **miles**
7. **Farm → Town → Lake. How many miles in all?**

   _____

8. **Which is closer to the Lake: the Zoo or the School?**

   _____
